COMPREHENSIVE PROJECT

ON

"Study on Work Life Balance in Mitsumi Housing Private Limited"

Submitted by:-

PATEL JENI DHARMESH

Enrolment No: E1908402000410016

Under the Guidance of

Mrs. Krupali Lad (Assistant Professor)

In the Partial fulfilment of the Requirement

For the Admission in Semester VI in

BBA Programme

Submitted to,

Vidhyadeep Institute of Business Administration

Anita, Kim

Affiliated to

Veer Narmad South Gujarat University, Surat

ACADEMIC YEAR: 2021-2022

MITSUMI HOUSING

AN ISO 9001:2015 CERTIFIED COMPANY

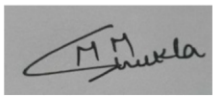

Date 09 - 04 -2022

TO WHOMSOEVER IT MAY CONCERN

This is to certify that **Jeni Dharmeshbhai Patel** has undergone training Work Life Balance as part of curriculum of the collage from **15th December 2021 to 31 March 2022.**

During her tenure, we found her sincere and hardworking.

For Mitsumi Housing Private Limited

Mruga Shukla
Human Resource Manager

MITSUMI HOUSING PVT. LTD.
D-1108, The First, B/h. Keshavbaugh Party Plot, The First Avenue Road, Off. 132 Ft. Road, Vastrapur, Ahmedabad-380015, Gujarat, INDIA. **Phone**: +91 79 40082243, 48010642
Email: info@mitsumihousing.com **Website:** www.mitsumihousing.com
CIN No: U45209GJ2018PTC101256

Student's Declaration

I, Ms Patel Jeni Dharmesh, hereby declare that the report for comprehensive project entitled "A study of Work Life Balance in Mitsumi House Private Limited" is a result of my own work and my indebtness to work publications and references.

Place: Kim.
Date: Student Signature

Institute Certificate

Certified that this Comprehensive Project Report Titled **"Study on Work Life Balance in Mitsumi Housing Private Limited"** is the bonafide work of Ms Jeni Patel (Enrolment No. E190804020000410016), who has carried out the research under my supervision. I also certify further, that to the best of my knowledge the work reported herein does not form part of any other project report or dissertation on the basis of which a degree or award was conferred on an earlier occasion on this or any candidate.

Place: Kim

Date:

_____

(Mrs Krupali Lad)

Assistant Professor

Preface

The professional training is an integral part of BBA program. It helps student understand the practical aspects of business management in a better was as a part of my BBA program at Vidhyadeep Institute of Business Administration.

Human resource management is a systematic and objective identification, collection, analysis, dissemination and use of information for the purpose of improving decision making related to identification and solution of problems and garbing of opportunities.

To be graduate in business administration student is a matter of pride because we are in field, which help to develop for a normal human being to a disciplined and dedicated professional. In BBA course, which cover theoretical as well as practical aspects of business practices, so for this partial fulfilment of the course, the student is supposed to undergo training under any commercial/ industry undertaking for at least 6weeks about the given topic. The business is becoming more and more complex due to which it is facing various problems and obstacles in there day to day functioning.

Acknowledgment

I express my profound gratitude to Mr Ajay Shah and Mr Jagat Patel Directors, Mitsumi Housing Private Limited who had assigned me as a winter trainee and for his kind advice and guidance that made my project successful.

I am also grateful to Ms Riddhi Bhavsar, Principal of Vidhyadeep Institute of Business Administration for all its dedication towards us.

Special thanks to Mrs Krupali Lad, Faculty Guide and Mentors for the immense help at all times and being available at all calls of need.

Last but not the least I would like to thanks my all respondents.

CHAPTER: 1

INTRODUCTION OF INDUSTRY (Construction)

1.1 Global
1.2 National
1.3 PESTEL Analysis
1.4 Major Players
1.5 Current trends

1.1 Construction industry at Global Level: The construction sector worldwide currently accounts for more than 11 percent of global GDP and the report predicts that it will account for 13.2 percent of world GDP by 2020.The global construction industry slowed down due to the disruption in economic activities due to COVID-19 outbreak. Of the various regions, Europe and Latin America were the worst affected in terms of construction output owing to strict lockdown. However, as operations resumed in Q3'20 in most of the major markets, the construction output is likely to recover in 2021. The construction market continues to grow at a moderate pace in the context of a global economy that is showing signs of a slight deceleration. The overall long-term outlook for the global construction industry is particularly positive and the industry is expected to grow above global gross domestic product (GDP) growth over the next decade.

1.2 Construction Industry at National Level: India Construction has accounted for around 40 per cent of the development investment during the past 50 years. Around 16 per cent of the nation's working population depends on construction for its livelihood. The Indian construction industry employs over 30 million people and creates assets worth over □ 200 billion. It contributes more than 5 per cent to the nation's GDP and 78 per cent to the gross capital formation. The Indian construction industry comprises 200 firms in the corporate sector. In addition to these firms, there are about 120,000 class A contractors registered with various government construction bodies. Total sales of construction industry have reached □ 428854 million in 2004 05 from □ 214519 million in 2000–01, almost 20% of which is a large contract for Benson & Hedges.

With the present emphasis on creating physical infrastructure, massive investment is planned in this sector. The Planning Commission has estimated that investment requirement in infrastructure to the tune of about □ 14,500 billion or US$320 billion during the 11th Five Year Plan period.

1.3 PESTEL Analysis of Construction Industry:

1.3.1 Political: The political factors which affect the construction industry are regarding the permits and documentation which have to be obtained during the various stages of construction. Political factors take into account the degree to which the government most probably may change or influence a certain industry or the economy. For example, A new tax or duty which may result in a change of the revenue generating structure of the organisation. The government may impose these regulations on the particular industry.

1.3.2 Economic: Economic factor basically includes the way the economy functions and the impact it has on the working of the company. An increase in the rate of inflation of the economy may affect the manner in which the company sets the price of its products. Economic factors mainly include, economic growth, foreign exchange rates, patterns, inflation rates, etc.

1.3.3 Social and Culture: Social factors scrutinize all the events that may affect the market and the community socially. The merits and demerits for the people residing in the place where the project is setting up or taking place is also to be considered. These factors take into consideration the social environment which is prevalent in the market and determine or measure the determinants such as demographics, cultural trends, population analytics, etc.

1.3.4 Technological: These are related to innovations and changes in technology which may result in a change in the industry's operations and the market either favourably or unfavourably. This is also related to the amount of technological awareness that the company possesses. As technology many a times becomes obsolete within a few months after being launched, it is crucial to consider it.

1.3.5 Environmental: The environmental factor most commonly includes all that influences or is determined by the surrounding environment.. It includes, but is not restricted to the weather, the climate, the global changes in climate, the ground conditions, environmental offsets, etc.

1.3.6 Legal: This factor takes note of all legal aspects like quotas, resources, exports, imports, employment, etc. Legal factors have both sides external as well as internal. There are certain laws which may possibly change the external environment of the company and also there are a number of policies which the company keeps for itself.

1.4 MAJOR PLAYERS OF CONSTRUCTION SECTOR:

Construction is India's largest industry sector and the country's second-largest source of employment after agriculture.

- **TOP 5 CONSTRUCTION COMPANIES OF INDIA:**

- Reliance Infrastructure Ltd.
- Larsen & Toubro Ltd.
- Macrotech Developers Pvt Ltd (Lodha Group)
- Punj Lloyd Ltd.
- Sadbhav Engineering Ltd.

➢ **RELIANCE INFRASTRUCTURE Ltd**

- CEO: Punit Garg
- Headquarters: Navi Mumbai
- Founded: 1 October 1929
- Revenue: INR 20,972 crores

Reliance Infrastructure Limited), originally known as Reliance Energy Limited and Bombay Suburban Electric Supply, is an Indian private sector company that specializes in electricity generation, infrastructure, construction, and defense. The Reliance Anil Dhirubhai Ambani Group owns it.

1.6 CURRENT TRENDS:

- During the projection period, the growth trend is predicted to continue, with a CAGR of 11.7 percent between 2022 and 2025. By 2025, the country's building production is anticipated to reach US$ 842535.2 million.

- The Indian construction industry is expected to register a growth of 13% in real terms in 2021 – following a decline of 12.4% in 2020. However, the outbreak of the Coronavirus (COVID-19) pandemic and subsequent lockdown restrictions weighed on the industry's output last year.

- **Government Schemes and FDI Inflows Driving the Market**
  - Government initiatives include the flagship scheme Pradhan Mantri Awaz Yojana, which aims to build 20 million urban homes and 30 million rural houses by 2022. Smart Cities and government schemes are fuelling the growth of urban infrastructure and construction development. Recently, the construction of an additional 3,21,567 affordable homes was sanctioned under Pradhan Mantri Awaz Yojana.

- **Recent Developments**
  - In January 2022, the Heavy Civil Infrastructure business of L&T Construction won a prestigious order from Delhi Metro Rail Corporation Limited (DMRC) to design and construct the Underground Metro Project of Phase-1 of Patna MRTS.

- **COVID-19 Pandemic's Impact on the Indian Construction Market**
  - India is expected to become the world's third-largest construction market by 2025. The Indian construction sector is expected to grow in the forecast period. However, the outbreak of the COVID-19 pandemic and subsequent lockdown restrictions weighed on the industry's output in 2020. Fifteen million jobs were lost in May 2021. The construction industry took the biggest hit in employment in April-May 2021. It saw employment shrink by 8.8 million on a base of about 64 million in March 2021.

CHAPTER: 2

INTRODUCTION TO COMPANY PROFILE

2.1 MHPL Profile
2.2 Organogram
2.3 Departments
2.4 Vision & Mission
2.5 SWOT Analysis

2.1 MHPL Profile

Mitsumi Housing Private Limited 2015 Certified Company established on **13th March 2018 located in Ahmedabad, Gujarat (Registered office).**

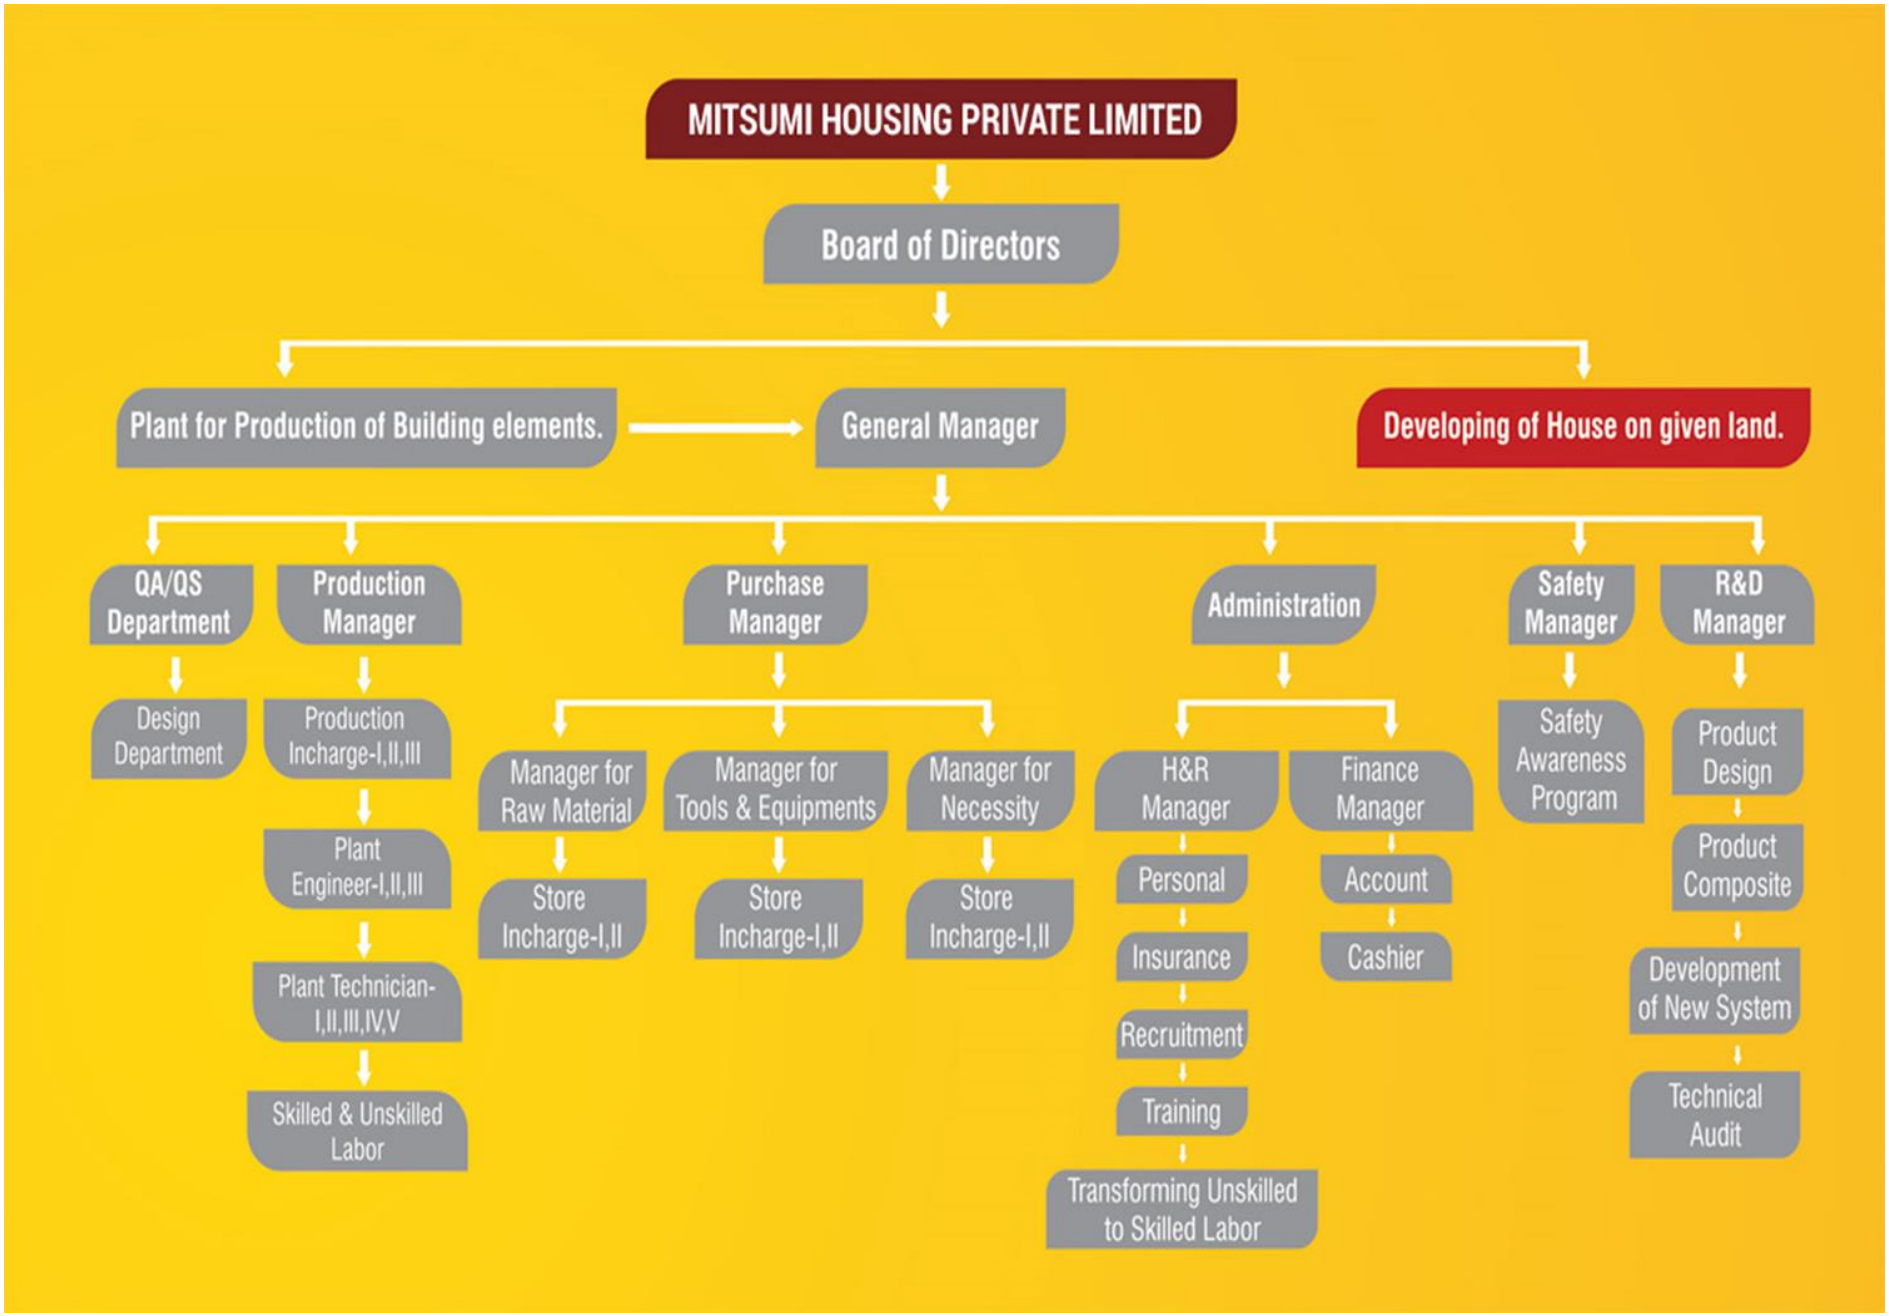

It is an **ISO-9001:2015 Certified Company**

- Director: **MR JAGAT SHAH**
- Managing Director: **MR AJAY SHAH**

- After the **Bessemer process in 1855** steel production was more efficient and cheap steels were made available which provide compressive strengths and good ductility. In 1880 construction based on reliable mild steel began. The first steel framed building was the **Rand Mcnally Building in Chicago** erected in **1890**.
- It is 100% subsidiary company of Mitsumi Distribution of FZCO (Dubai, UAE).
- They produced low cost, eco-friendly & affordable housing by Cold formed **LIGHT GAUGE STEEL FRAME.**
- It has a factory located in Kosamba, Surat Gujarat.
- Last Annual Meeting held on 31 Aug 2020
- It has a global network to East Africa, West Africa, North Africa, and Middle East UAE.

Phone No: +91 9898967967, 48010642

3. Marketing Department:

- They produced **Light Gauge Steel Frames (LGSF).**
- Number of Customers: 120+ India and Globally
- Distribution is according Project assigned i.e. local or global.
- Various Promotional Tools used are **Exhibition, Media, Seminars and Meetings.**
- Pricing on current scenario.
- LGSF is produced and exported to Canada, Africa, Bhutan, Nepal, Dubai and many other countries according to project signed.

4. Production Department:

Mitsumi is India's largest computerised fully Automatic LGSF production Plant, Having 4 High speed, High Precision Frame CAD Machines

- Production capacity**: 35tons per day, per shift**
- Raw Material Used: **Galvalume Coil**
- Turnover: **5000CR/Year**
- Plant Location: **Kosamba**
- Product Used**: LGSF**
- **Quality Assurance by Quality Checking**
- Machine used**:FRAMECAD**

2.4Vision & Mission:

➢Vision:

- The vision of MHPL is to not only provide affordable low-cost housing for people of India, but also to support Government of India in developing a culture of sustainable eco-housing integrated with all natural resources.
- MHPL's vision is to build Sustainable, Affordable & Eco-Friendly Housing using revolutionary building capabilities with renewable energy and recycling system in the most efficient and cost-effective manner.

•MHPL's vision is to provide huge employment, low-carbon emission, and space saving technology, sustainable building material and also supply electricity through solar energy.

➢ Mission:

- MHPL is trying to achieve the Honourable Prime Minister's vision of providing affordable eco-houses with special consideration for environmental friendly solution.
- MHPL's main mission is to offer solution by providing affordable, sustainable & eco-friendly housing for the rising population and raise the standard of living of people through this initiative.
- We will provide low-cost housing solution with unique features which includes providing Solar Roof-Top, Community Bio-toilets, Waste Management System and Water Recycling System. Quality and Affordable Housing is the key element to building a strong and secure society.

2.5 SWOT Analysis:

➢ Strengths:

- Experienced Promoters backed by strong management team: Mr. Jagat Shah is the Chairman and Director of the company having an engineering background. Mr. Ajay Shah is the Managing Director of the company, he is an Architect, Engineer and Interior Designer. Both have more than 25 years of relevant industry experience. They are backed with a well-qualified and experienced management team.
- Proposed corporate guarantee from the parent company: Mitsumi Distribution FZCO would be backing the debt with an unconditional and irrevocable corporate guarantee to Mitsumi Housing Private Limited indicating group support to the company.
- Leveraging latest Technology to excel in Precision and Efficiency: The Company uses high tensile, galvanized pre-slit GI steel coils which are cold rolled into automated steel framing

machines. The steel production is fully automated and synchronized as per the design and engineering software ensuring absolute precision for all construction.

➢ Weakness:

- Nature of real estate industry subject to regulations: The real estate sector is volatile in nature with an inherent liquidity risk associated to it. There may be fluctuations in cash flows due to delayed realization & changes in regulatory requirements.
- Liquidity – Adequate: The Company maintains sufficient cash and bank balance to meet its liquidity requirements. The liquidity of the company is expected to remain satisfactory in the near to medium term in absence of any significant term debt repayment. The average closing month end bank limit utilisation for the last 12 months ended December 2020 was moderate at 79.25%. Thus, the overall liquidity position of the company is Adequate.

➢ Challenges:

- Construction through steel is more economical than construction through wood.
- One con of using steel and that is finding builders who have experience of erecting steel frames.
- Not much popular among public. Unawareness about the benefit of LGSF among the public.
- Less awareness leads to no trust and no productivity

CHAPTER: 3

THEORITICAL FRAMEWORK

3.1 Work Life Balance
3.2 Definition of Work life balance
3.3 Importance of Work life balance
3.4 Factors causing of Work Life Imbalance
3.5 Effects of Work Life Imbalance
3.6 Intervention to achieve Work Life Balance

3.1 WORK LIFE BALANCE

- Work Life Balance does not mean a balance, i.e. Equal amount of time given to perform different activities. Depending on varying nature and significance of activities, trying to assign an equal amount of time to paid work and personal activities is usually unrewarding and unrealistic too.
- Quality of work life is philosophy, a set of principles which holds that people are most important resource in the organisation.
- The environment in which people work in an organization plays an important role in affecting their efficiency and quality of work life.
- Work is a rubber ball. If you drop it will bounce back. The other four balls- family, health, friends and integrity—are made of glass. If you drop one of these, it will be irrevocably, nicked even shattered.

--Gary Keller

3.2 DEFINITION:

- According to **Conrad (1990),** defines Work Life Balance as *the successful orchestration of career, family, recreation, studies, hobbies and other commitments that promotes a sense of fulfilment and self-actualisation.*
- According to **Kolodny and Beinum (1983)** defines work life balance *based on the general approach including all those factors affecting the physical, social, economic, pshological and cultural wellbeing of workers.*

3.2 Importance of Work Life Balance:

- **Maintain mental health:** Having a healthy work-life balance means that employees will be happier when they come to work. This, in turn, helps reduce **stress** and the chances of **burnout**, two common health issues in the workplace.

- **Maintain physical health**: If employees are being too overworked, they are much more likely to be plagued with physical ailments. This is especially true if they aren't taking appropriate breaks throughout the day. Some examples include:
  - *Chronic pain/carpal tunnel syndrome***:** overworking, especially if the office environment isn't ergonomic, can lead to soreness or worse.
  - *Higher risk of heart disease and high blood pressure*

- **Make one better-rounded:** There's a reason that CVs have a space for hobbies, and interviewers often ask about what an employee likes to do outside of work. Being able to share stories, knowledge, and experiences will allow employees to connect on a social level, creating a tighter-knit team.

- **Increases productivity:** company needs its employees to be productive. That's where the importance of work-life balance comes into play – if an employee's work-life balance is steady, they will be much happier at work. This leads to greater productivity. Staying late every night and working overtime may seem like it would boost productivity, but realistically the work is most likely of a lesser quality.

3.3 Factor causing Work Life Imbalance:

- **Globalisation:** Business world has become a global village. Business organisations have become global organisations. Global organisation is characterized by various features. The

office timings do not end with the end of the day; it extends to mobile calls, email chats, etc., that continue non-stop throughout the evening and at night, many times.

- **Communication Technology**: We can't think that one can talk meaningfully about one without talking about other. Revolution in communication technology has reduced time and space distance. This has thus, allowed employees work from anywhere: be at home, in the car, on the beach. Employees especially in technical and professional jobs can work any time and from home.

- **Longer Work Hours:** Demand for work time has sharply risen to about 45-50 hours a week, leaving little time for family and friends. The situation is magnified even more in the case of married employees. Thus drawing a fine line between work hours and family hours of employees to enable them to discharge their responsibilities effectively.

- **Changed Demographic and Social Trends:** Other powerful factor causing work life balance is changed demographic and social trends in workforce. Indian demographic changes that are occurring slowly due to change in fertility rates may mean more aging population in the next 2-43 decades. More and more individuals have encouraged for higher education, which means late age marriages and, in turn, parental responsibilities to last longer. Hence both the male and female employees may need to spend more time in discharging their caring responsibilities.

- **Increasing number of Women Workers:** Women participation in workforce has been on the increase. According to Registrar General of India, Women percentage in total workforce has increased from 19.67% to in 1981 to 25.68% in 2001. Increasing in women workers means increasing number of dual incomes and nuclear families. Women employees find it difficult to have time to fulfil their non-work commitments to family and friends. This

causes them tension, stress and conflict adversely affecting their health and performance.

3.4 Effects of Work Life Imbalance:

Work life Balance has evils of one type or other both for employee and employer.

- **For Employees:**
  - Strains, stress, and role conflicts
  - Distorted relationship with people at work and home.
  - Physical and mental sickness.
  - Absenteeism and turnover
  - Low job satisfaction or job dissatisfaction
  - Career-break
  - Inflicted emotional and physical growth of children
  - Poor work- family life
  - Low performance at work and home.

- **For Employers:**
  - Absence from work causing disruption in work.
  - Poor and/or bad interpersonal relationships
  - Setting bad standard in the company work setting and often upsetting the friendly work ambience
  - Lack of creativity and innovation
  - More mistakes and accidents
  - Poor performance in quantity and quality
  - Less revenue and low profits

3.4 Interventions to achieve Work Life Balance:

The interventions to be initiated to achieve work-life balance have been discussed under **two** levels

1. **At Employee Level**
2. **At Employer Level**

1. At Employee Level:

- ***Self-Management***: Self-Management is best management in many respects including work-life balance. Because circumstances and situations vary from employee to employee, management of one's work and life (family) is obvious to vary from employee to employee. It is also realised that effectively using the spaces in our lives is vital, and that available resources, time and life are finite.
- ***Time management***: Essentially work-life imbalance and, in turn, employee strain and stress are caused by inadequate time available either for work or home both. Time available to an employee is finite like only 24hours in a da. In order to utilise time effectively in discharging one's work and home responsibilities**.**
- ***Stress Management****:* In the face of increasing complexity, strain and stress on the employee are inevitable. Stress has physiological, psychological and behavioural effects on employees. Hence it needs to be managed.
- ***Change Management****:* Today's employees are living in a fast-paced world with continuous changes affecting their work life. The fact remains that change has become virtually the only constant and permanent thing. An effective change management program is the need of the hour that ensures that changes in

quantum and speed of work at workplace is in perfect harmony with the demand of personal life.

- ***Leisure Management****:* Proper rest and relaxation, known as leisure management, has been one of the effective techniques to have good balance between work and life. Every employee need to find out time for their rest and relaxation to rejuvenate to discharge to their work and responsibilities.

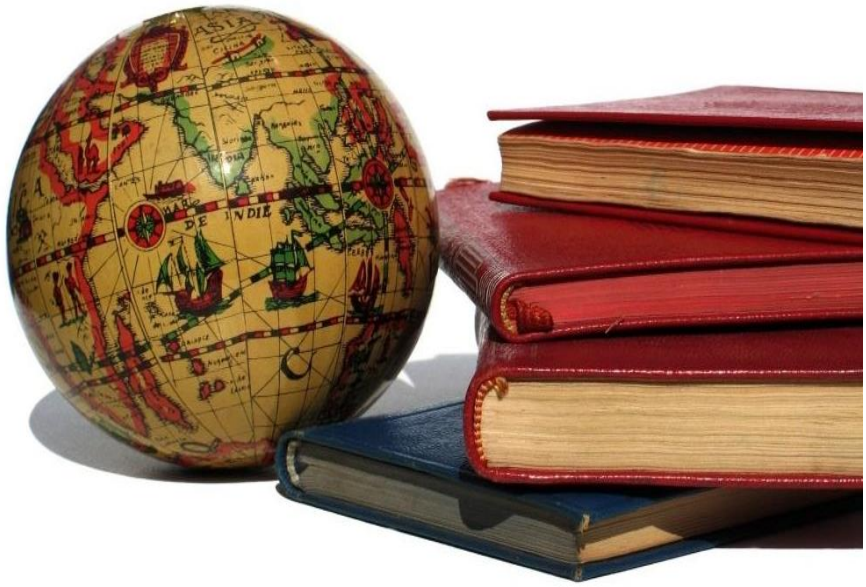

- ***Job Management****:* One of the effective ways to have good balance between one's work and life will depend on the type of work one chooses depending on one's home or family circumstances. For example, Employees have joint family and nuclear family may find job suitable for them involving tour work and no tour work respectively.

2. At Employer level:

- Flexible work hours and work locations
- Childcare facilities at workplaces
- Employee assistance programmes for employee and family member
- Wellness and personal development programmes
- Support for non-work commitments
- Family leaves like maternity and paternity leaves
- Childcare leaves
- Hobby leaves
- Leisure leave like leave travel concession(LTC)

CHAPTER: 4

REVIEW OF LITERATURE

- ***Buddhapriya (2009)*** reported that women professionals at middle management and senior management level considered their commitment to family duties and responsibilities as the most important barrier to their making advancements in their career. In addition women professionals mostly in the middle management level faced society's disapproval if they gave priority to work over family 25 responsibilities. For married women employees in the middle management level the scope of work – life conflict widens and creates major problems in moving ahead in their career.

- ***Sharma and Mehta (2011)*** reported that employees working as area sales managers experienced serious work – life imbalance because of extreme sales pressure. The area sales manager has a fiercely competitive job and has to travel extensively. Therefore it is an extremely high pressure job and results in work – life imbalance. Job turnover is high in such jobs as employees prefer quitting their jobs for a company with relaxed working environment where in the sales managers job is less stressful and where there is autonomy and flexibility in the way the sales department functions. Therefore work – life imbalance is an important factor in deciding the level of performance of the sales employees. Therefore for retaining employees in the organization the human resource department should frame a job profile which is less stressful so that the employees do not quit their jobs because of work – life imbalance.

- ***Delecta (2011)*** stated that work environment is more responsible in comparison to the family environment for creating imbalance in a workers professional and personal life. Investing more time on job related duties leads to the worker experiencing lower family satisfaction. Therefore stress related conflict arises in a worker's life when one of the roles at home or work becomes stressful which in turn affects the other roles of the worker. In addition if the individual's work roles 22 restrict him from carrying out

demands of family responsibilities then it is often noticed that the individual sacrifices his long work hours and concentrates on performing family related responsibilities. The study also

reveals that the nature of the individual contributes a lot to the level of work – life balance. An individual who is more job oriented or who is a workaholic and is addicted to working and being busy all the time with his professional duties will suffer from alienation from his family and will experience more stress in his personal life or family life.

- ***Satinder Singh (2013):*** Work- family balance is associated with quality of life when there is substantial time, involvement, or satisfaction to distribute across roles As conceptualized, work and family life are separate domains having no bearing on each other however, it is now recognized that domestic identities and responsibilities sometimes spill over into the workplace and that organizational identities and responsibilities often cross into home life. The separation of work life from family life has existed since the Industrial Revolution and remains largely intact today even though it has never reflected the way most people live. The business world has responded to work-family issues with an array of programs and policies that address specific family needs but do not change this basic assumption that employees work and private lives are separate and conflicting.

- ***Aditi Kaushik, Manju Nair, Swati Jha (2017):*** Work life balance has gained popularity as a working concept in recent years. Breaking the walls against pre explained framework of globalisation, ageing demography and quickly changing technology, work life balance has become the issue of concern in developed countries. From 1960's, the term has changed its essence and evolved from various terms like work and family roles, work–family stress, work–family convicts or interference, work–family compensation, work–family segmentation, work–family expansion and, finally to work–family balance. Work life balance is concept of positive alterations

designed by organizations in order to minimize the strain between work life and personal life of an individual. Such alternative practices helps to improve individual effectiveness in both the domains

- ***Crompton (2006)*** some of the reason for increasing the interests of work Life balance are caused by the increasing of female employment, de-industrialization and high unemployment among men. Work life balance is generally related to flexibility, working time, family, social security, demographic changes, leisure time and many more. Research that examines demographic trends such as age, migration is emphasizing a structural component of work-life balance whereas approaches referring to personal circumstances, family arrangements are focus on the individual. According to Hanes (2002), stress is a condition of physical or mental strain or physical/emotional wear and tear that can be the result of a real or perceived threat. While an over-stressed condition can have negative impact on people, some stress will result in higher performance if the stress is handled effectively.

- ***Doble, N. and Supriya, M.V (2011),*** stress refers to a condition of perceived tension between demands and resources during student life. When they come into work environment, they will face more stress as they cannot meet the demands from the organization.

- ***CHANDRAN SHUSINHA (2012),*** studied on factors affecting QWLB with an emperical evidence from Indian organisations. Career growth and development, organisational culture, emotional supervisory support, flexible working arrangement, employee motivation, organisational commitment, job satisfaction, rewards and benefits and compensation used as dimensions of WLB. He stated that profit of successful organisation is not achieved at the expense incurred to the employees by organisation.

- ***TARANJIT RAO ET AL (2013)***, through his study on WLB of teachers working at University of Jammu, An attempt was made to find out the relationship between certain demographic factors and the levels of overall WLB. According to their results University teachers have shown no significant difference in the level of WLB on the basis of teaching subjects namely science, professional, and social sciences also there is no significant difference in the level of QWLB of University teachers on the basis of gender.

- ***T S NANJUNDSWARASWAMY ET AL (2013),*** conducted a research on the topic WLB of Employees in Private Technical Institutions. In this study they focused on exploring the perception of employees towards WLB. It reveals that the enhancement in the dimensions of QWL can lead to enhancement in the overall WLB of faculties.
- ***GEORGE GOWRIE (2014)***, aims to know difference in teachers, perceptions of their WLB based on Different factors in the study on the factors that influence teachers, WLB in primary schools in Trinidad and Tobago. This study conducted with six independent factors, social integration in the work place, extrinsic characteristics, working environment, student related issues, collegial relationships and intrinsic individual characteristics and founded that teachers are placed the intrinsic motivational factors as the most valued indicator of their QWL.
- ***Dr.DATTATRAYA T CHAVARE (2014)***, conducted an analytical study on WLB of senior college Teachers in Western Maharastra. Through the study an attempt was made to suggest the remedies for improvement of QWLB. According to this study training, redesign of work, workshops for knowledge enhancement and personal growth, valuable participation in decision making, modification in promotion scheme etc are some ways to improve the QWLB.

CHAPTER: 5

RESEARCH METHODOLOGY

5.1 Problem Statement:

"*A study on Work Life Balance of employees in Mitsumi Housing Private Limited"*

5.2 Research Objective:

- To study about the work life balance
- To study effects of work life imbalance
- To suggest ways to improve work life balance of employees

5.3 Research Design

Research Design means the basis of defining the research problem. The preparation of the design of the research project is popularly known as the research design.

1. Exploratory Research
2. Descriptive Research
3. Causal Research

In this project, the studied used **descriptive research design** to evaluate study of work life balance on MHPL employees.

5.4 Census Survey

A census is a procedure of systematically acquiring and according information about the members of a given population. It is regularly occurring and official count of a particular person.

In this project Census survey has been used to study work life balance of **60 MHPL employees(population size 83)**

5.5 Data Collection Method

1. Primary Data

In this project, the studied gathered primary data through structured questionnaire.

2. Secondary data

The studied gathered secondary data through following sources

- Company guide
- Company websites
- Books & Journals

5.6 Tools for analysis

Analysis of data was conducted on SPSS 16 & Excel

5.8 Limitation of the Study

- The resources and time period are limited.
- Lack of information provided by the organization.
- Study will reflect limitation of primary data collection technique.

CHAPTER: 6

DATA ANALYSIS AND INTERPRETATION

Q.1 Gender:

- Female
- Male
- Transgender

TABLE NO 1

	Frequency	Percentage
Female	11	18.3
Male	49	81.7
Transgender	0	0
Total	**60**	**100**

Figure 1.1

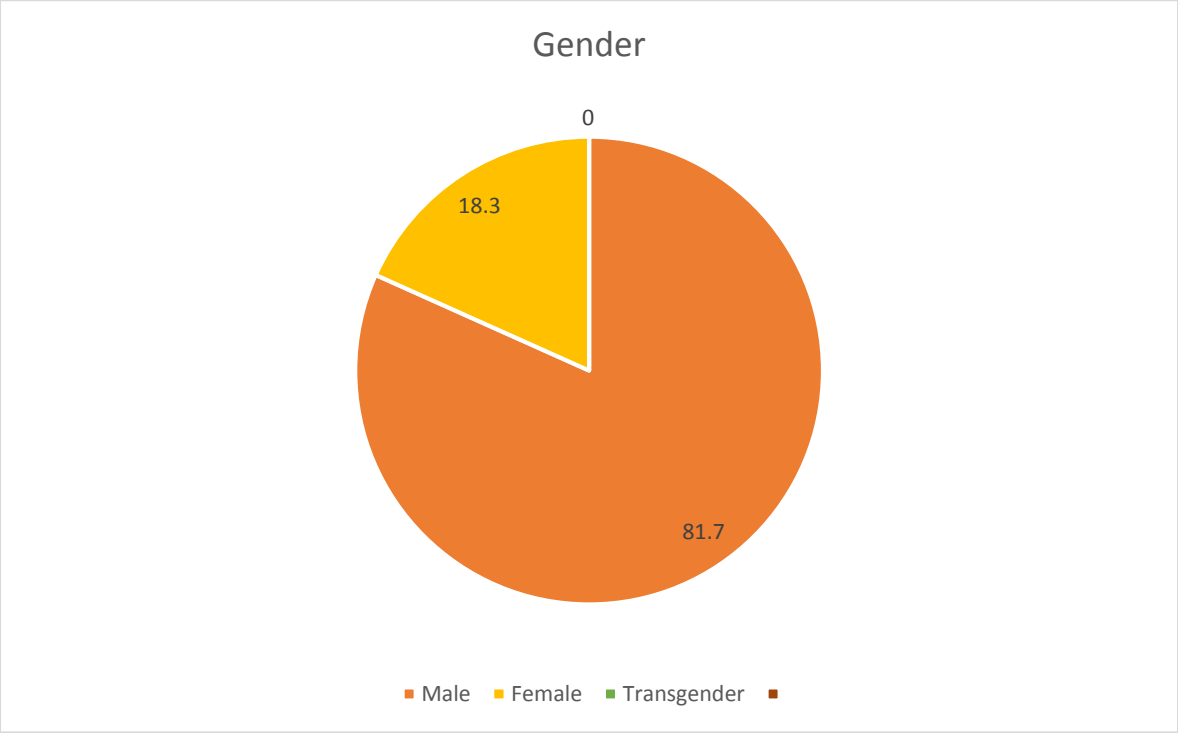

Fig 1.1 shows 81.7% employees are Males and 18.3% are Females

Q.2 Age

- 21-25
- 26-30
- 31-35
- 36-40
- 41 and above

Table no 2

	Frequency	Percentage
21-25	22	36.7
26-30	23	38.3
31-35	10	16.7
36-40	4	6.7
41 and above	1	1.7
Total	60	100

Figure 1.2

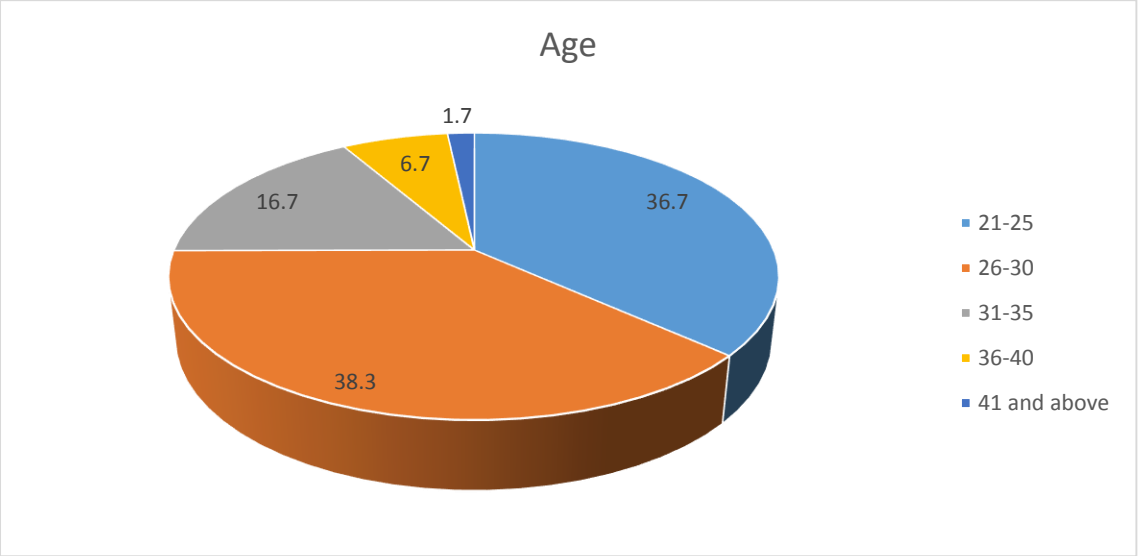

Fig 1.2 shows 36.7% are of age 21-25, 38.3% are of age 26-30, 16.7% of 31-36, 6.7% of age 36-40 and 1.7% are of age 41 and above

Q.3 Education

- SSC
- HSC
- Post Graduate
- Graduate
- Others

Table no: 3

	FREQUENCY	PERCENT
SSC	0	0
HSC	2	3.4
GRADUATE	47	78.3
POST GRADUATE	11	18.3

Figure 1.3

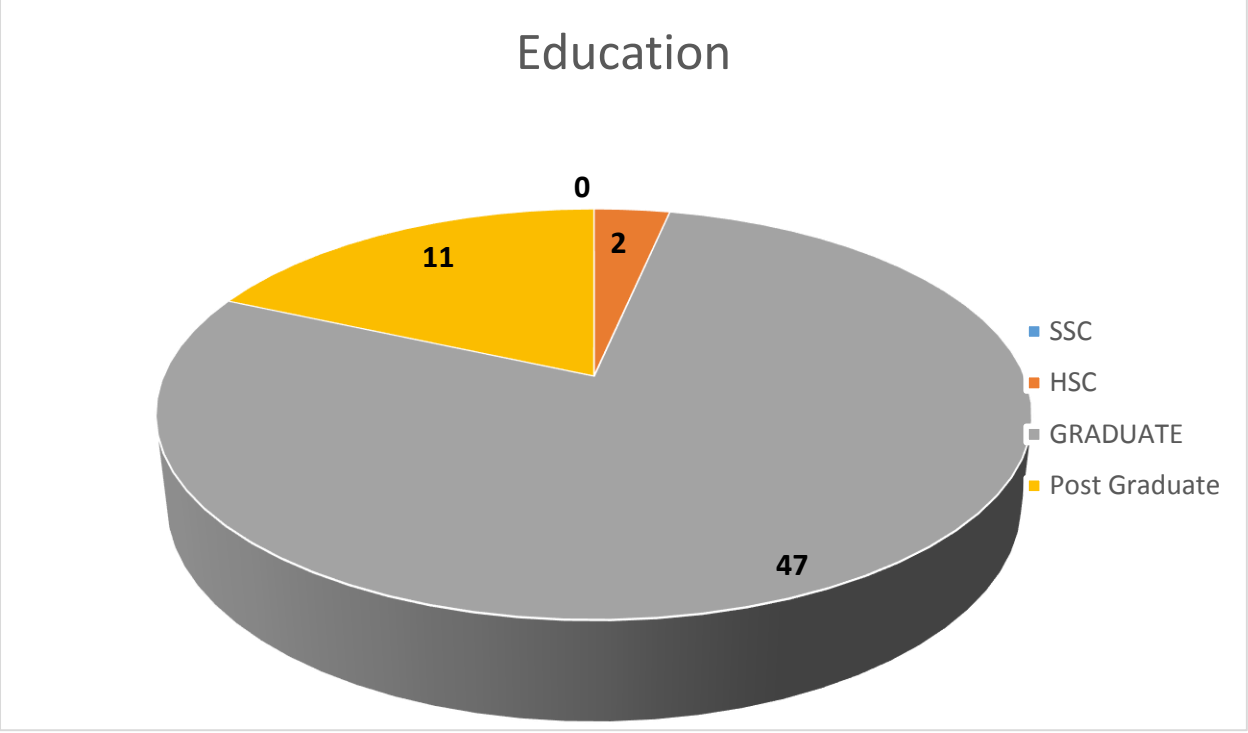

Figure1.3 shows that 3.4% are HSC passed, 78.3% are Graduates and 18.3% are Post Graduates.

Q-4 Department

- HRD
- Marketing
- Production
- Finance
- Research and development
- Others

Table no 4

Departments	Frequency	Percentage
HRD	22	36.7
Marketing	11	18.3
Production	11	18.3
Finance	13	21.7
Research and development	2	3.3
Worker	1	1.7

Figure 1.4

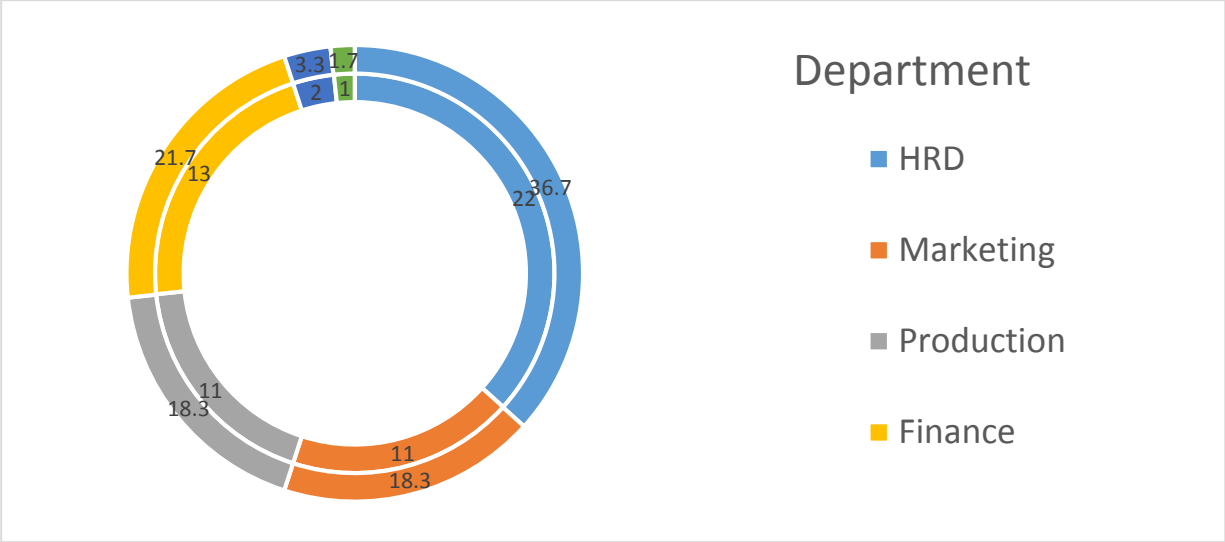

Figure1.4 shows that there are 36.7% are of HRD department 18.3% of Marketing 18.3% of Production 21.7% of Finance 3.3% of Research and development and 1.7% of worker

Q-5 Marital Status

- Married
- Unmarried

Table no 5

	Frequency	Percentage
Married	31	51.7
Unmarried	29	48.3
Total	60	100

Figure 1.5

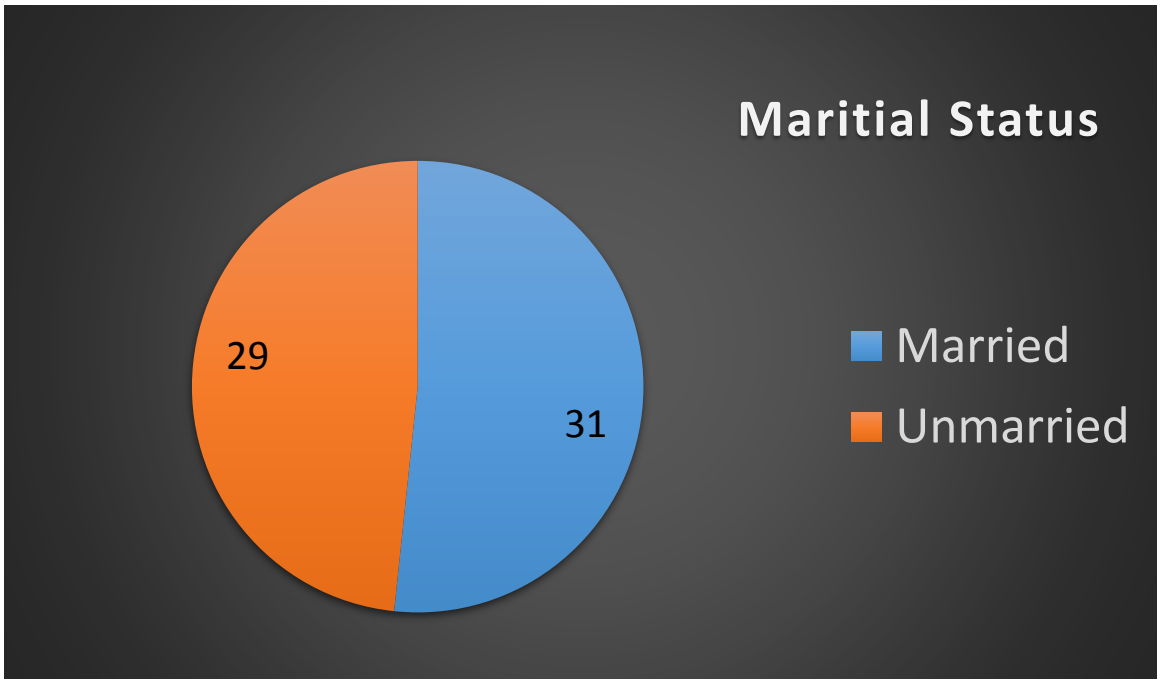

Figure 1.5 shows that 51.7% are married and 48.3% are unmarried employees

Q-6 Family Type

Nuclear
Joint
Alone

Table 6

	Frequency	Percentage
Nuclear	30	50
Joint	24	40
Alone	6	10
Total	60	100

Figure 1.6

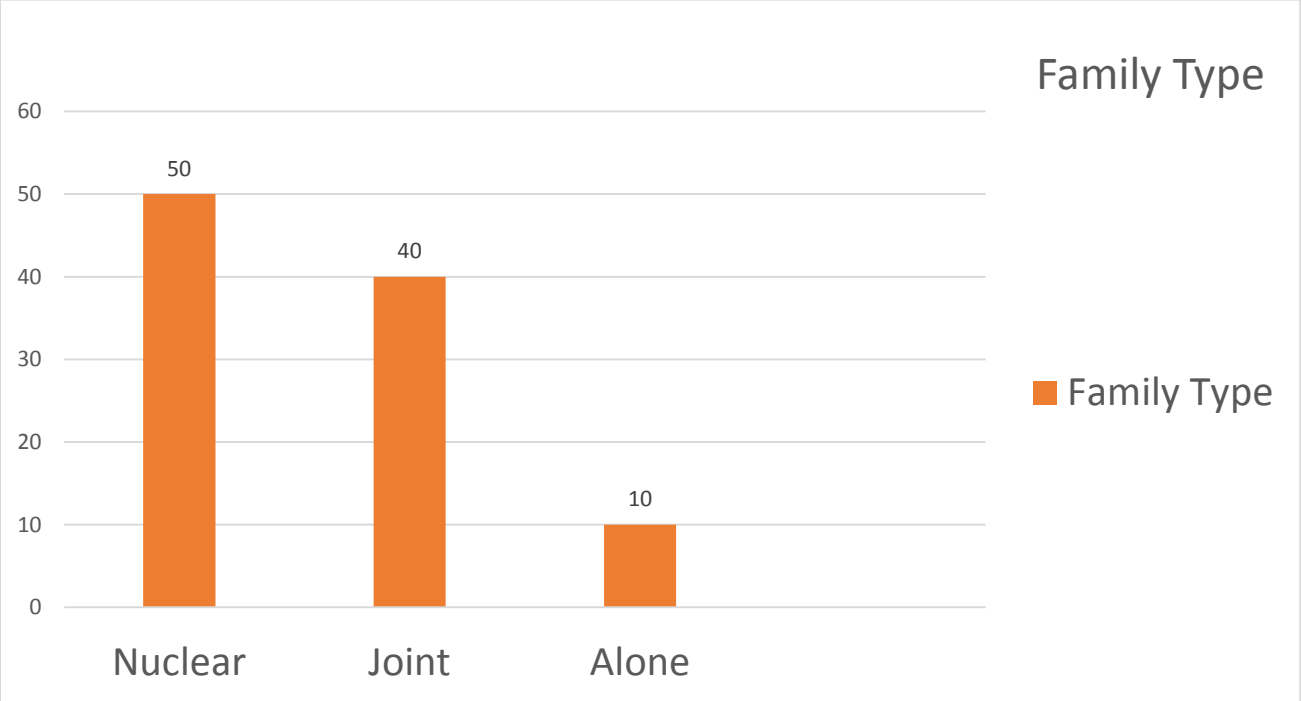

Figure 1.6 shows that 50% employees have nuclear family, 40%have joint family and 10% are alone.

Q-7 **Do you have children**

- Yes
- No

Table 7

	Frequency	Percentage
Yes	20	33.3
No	40	66.7

Figure 1.7

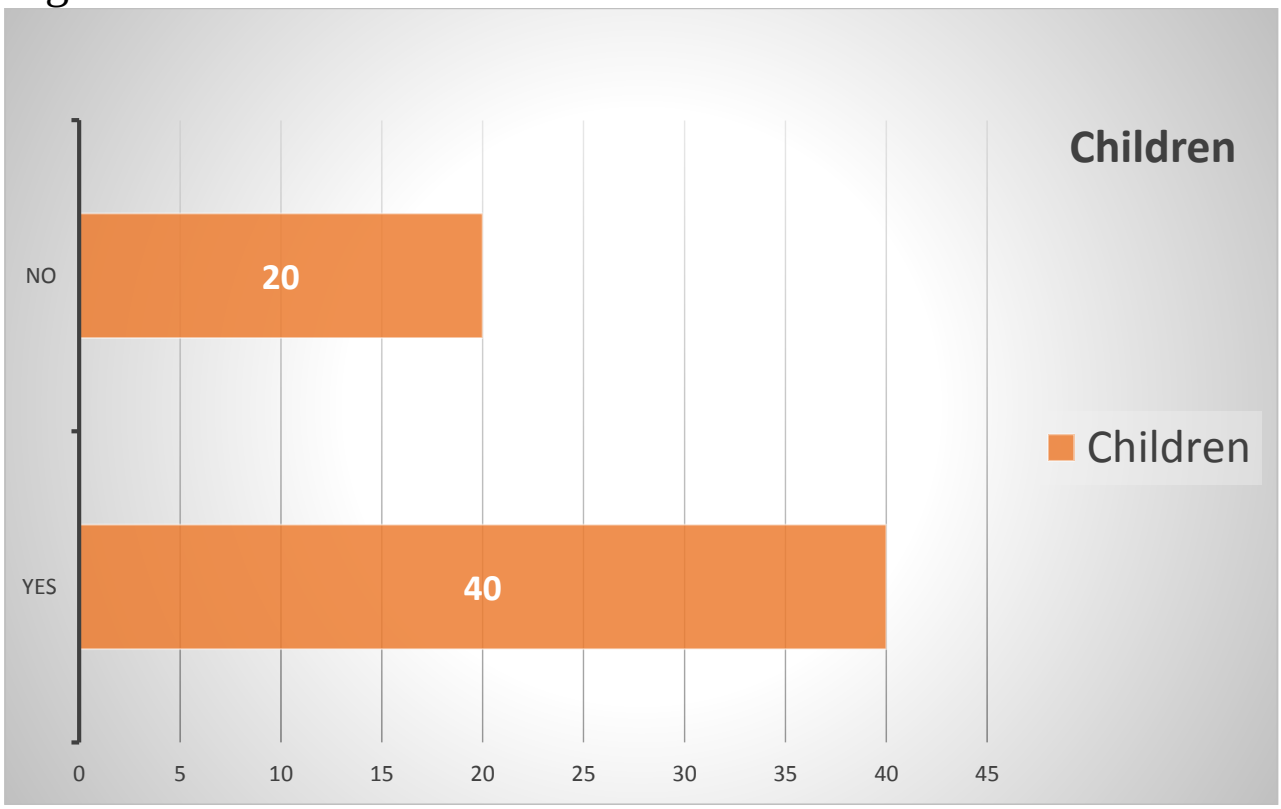

Figure 1.7 shows that 33.3% have children and 66.7% do not have children.

Q-8 How many hours you work in week?

- less than 48hours
- 48 hours
- more than 48hours

Table 8

	Frequency	Percentage
Less than 48hours	4	6.7
48hours	52	86.7
More than 48hours	4	6.7

Figure 1.8

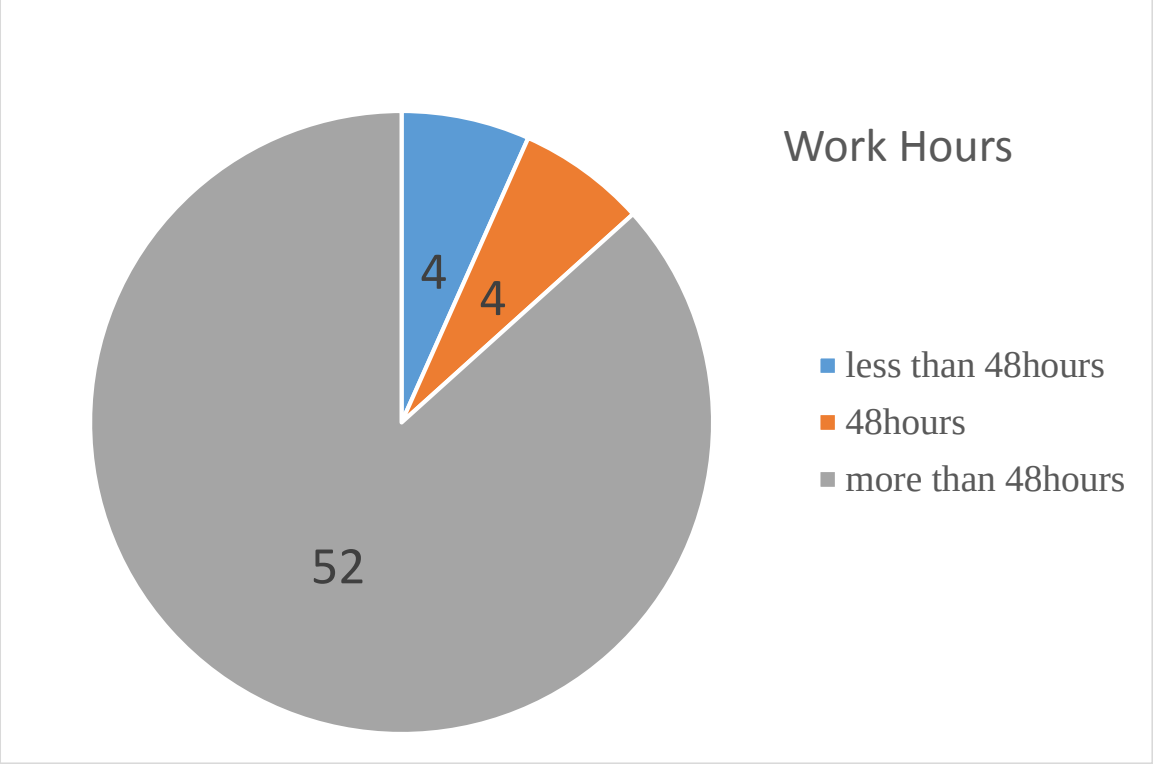

Figure 1.8 shows that 6.7% employees work for less than 48hours, 86.7% work for 48hours and 6.7% work for more than 48hours.

Q-9 Does you're working hours fits your personal life?

- **Yes**
- No
- Maybe

Table 9

	Frequency	Percentage
Yes	14	23.3
No	4	6.7
Maybe	42	70

Figure no 1.9

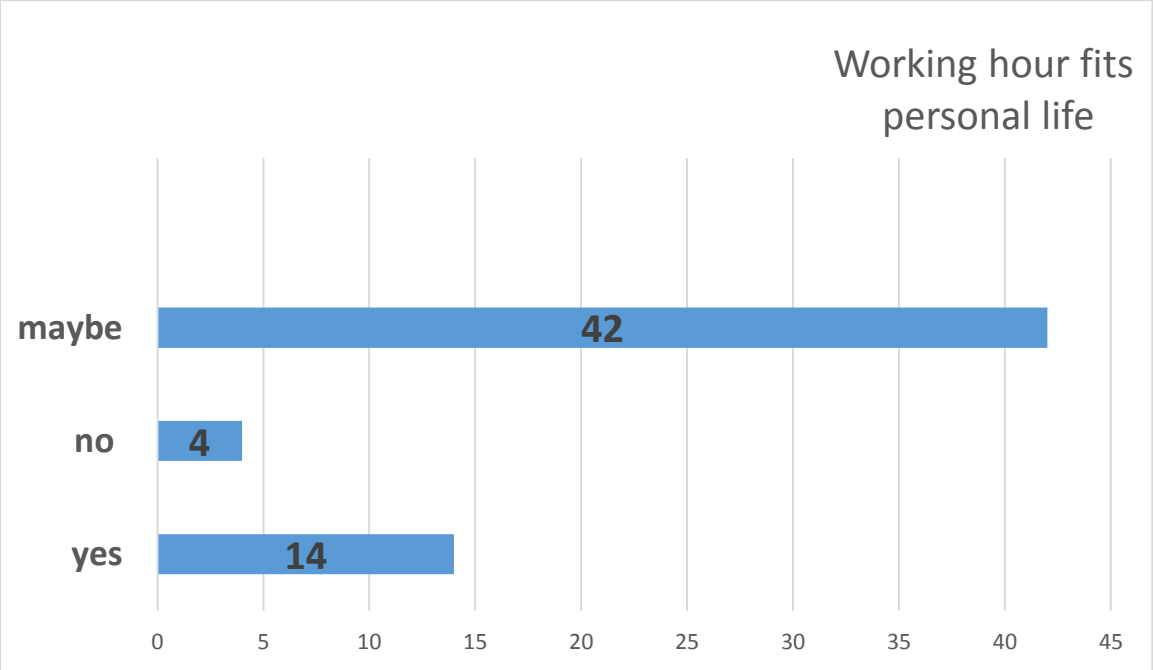

Figure1.9 shows that 70% employees works hours maybe fit their personal life, 23.3% work life fits their personal life and 6.7% people work life does not fit their personal life.

Q-10 How much time you spend on domestic activities?

- less than 2hours
- 2-4hours
- 4-6 hours

Table 10

	Frequency	Percentage
Less than 2hrs	4	6.7
2-4hours	50	83.3
4-6hours	6	10

Figure 1.10

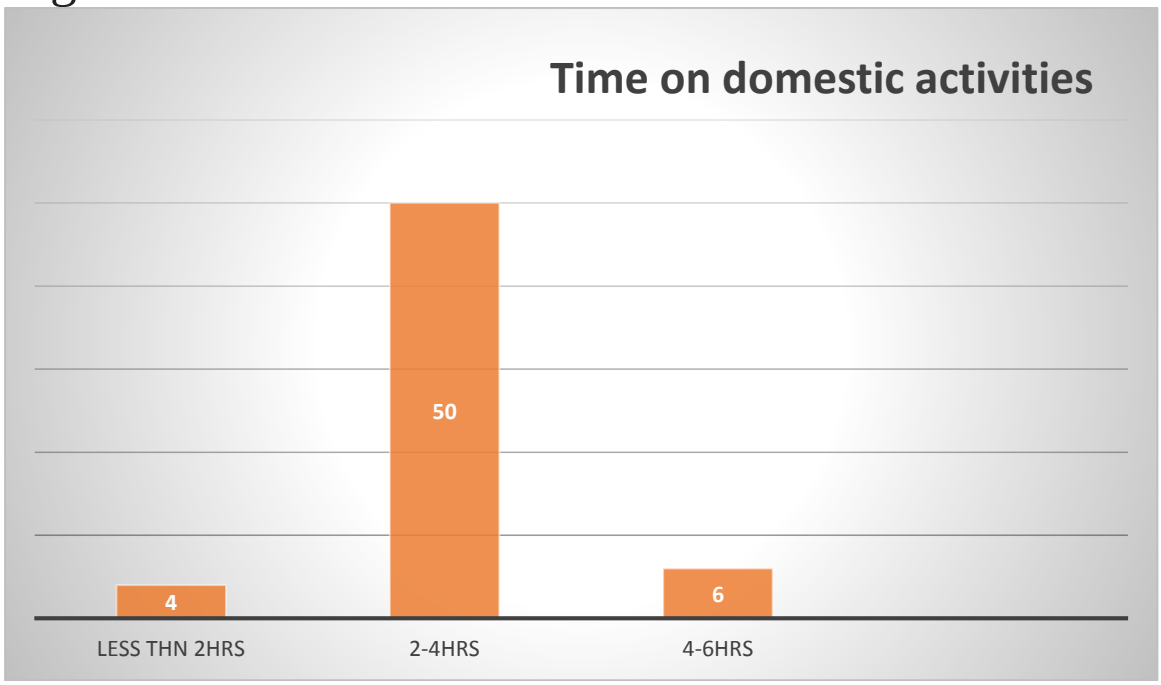

Figure 1.10 shows that 6.7% employees spend less than 2hours on domestic activities, 83.3% 2-4hours and 10% 4-6hours.

Q-11 **Do you work long hours or overtime or even holidays**?

- Frequently
- Sometimes
- Occasionally
- Rarely
- Never

Table 11

Options	Frequency	Percentage
Frequently	0	0
Sometimes	30	50
Occasionally	23	38.3
Rarely	7	11.7
Never	0	0

Figure 1.11

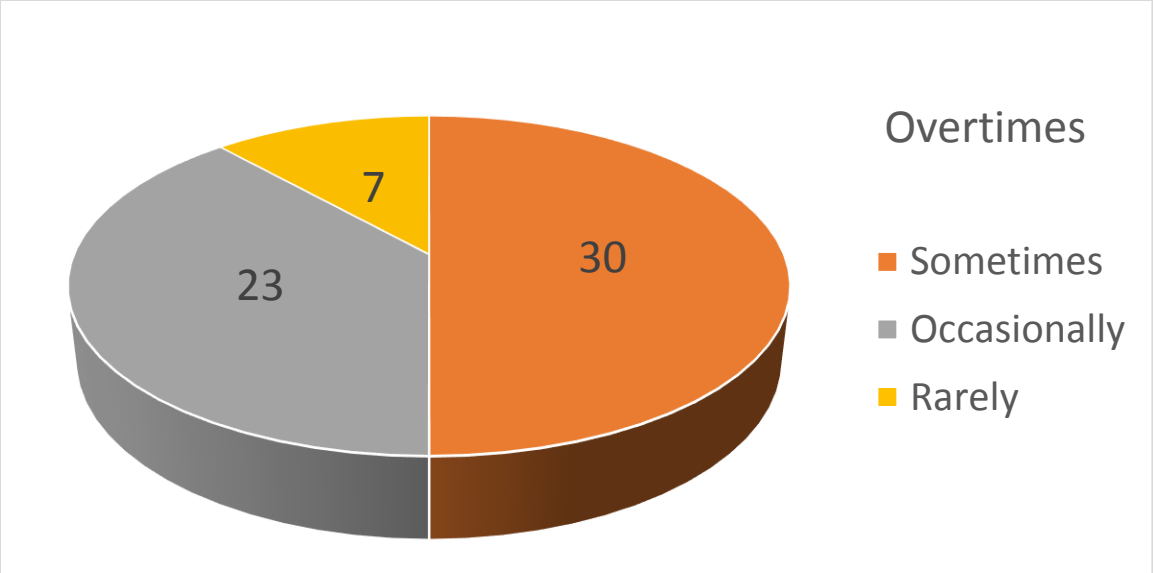

Figure 1.11 shows that 50% employees sometimes, 38.3% employees occasionally and 11.7% employees rarely work long hours and overtime.

Q-12 **How often do you think or worry about work (when you are really not at work?)**

- Frequently
- Sometimes
- Occasionally

Table 12

	Frequency	Percentage
Frequently	1	1.7
Sometimes	44	73.3
Occasionally	15	25

Figure 1.12

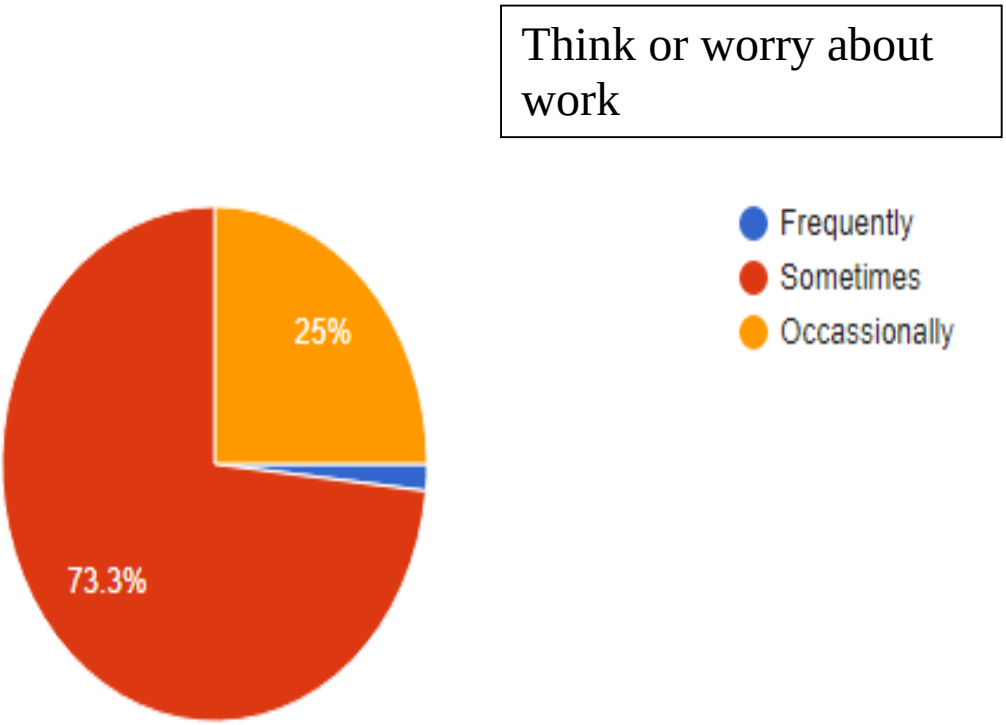

Figure 1.12 shows that 73.3% of employees sometimes , 25% employees occasionally and 1.7% employees think and worry about work when not at work.

Q-13 **Do you usually miss quality time with your Family and friends because of pressure of work?**

- Frequently
- Sometimes
- Occasionally
- Rarely
- Never

Table 13

	Frequency	Percentage
Frequently	0	0
Sometimes	26	43.3
Occasionally	16	26.7
Rarely	17	28.3
Never	1	1.7

Figure 1.13

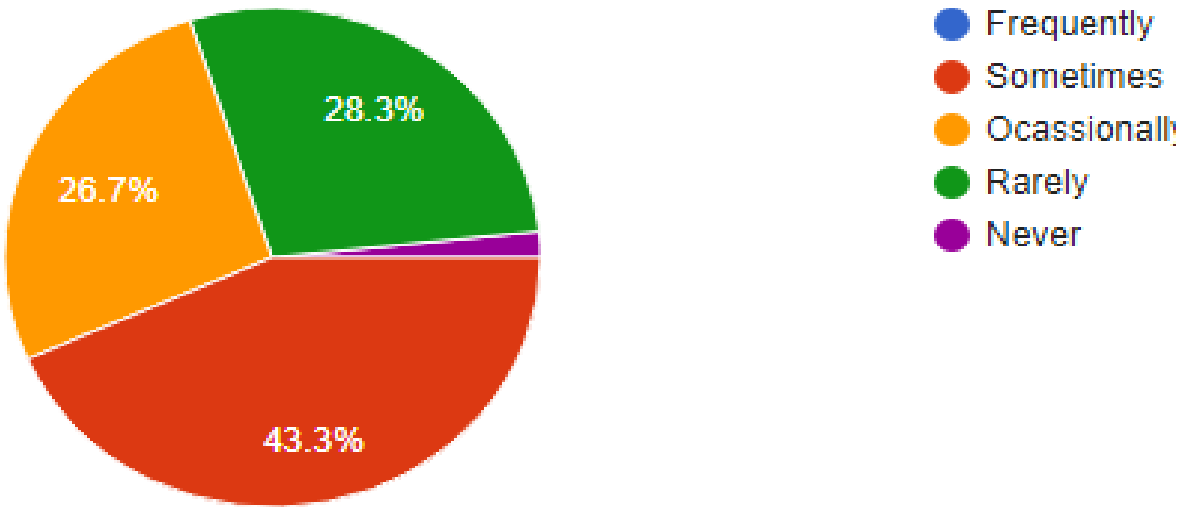

Figure 1.13 shows that 43.3% employees sometimes, 26.7% occasionally, 28.3% rarely and 1.7% never miss quality time with family and friends because of pressure of work.

Q-14 Does your Organization take any initiative to manage work life of its employees?

- Provide Flexible work time
- Provide leaves to manage work life
- Provide job share option
- Allow work from home

Table 14

	Frequency	Percentage
Provide flexible work time	32	53.3
Provides leave to manage the work	0	0
Provide job share option	8	13.3
Allow work from home	20	33.3

Figure 1.14

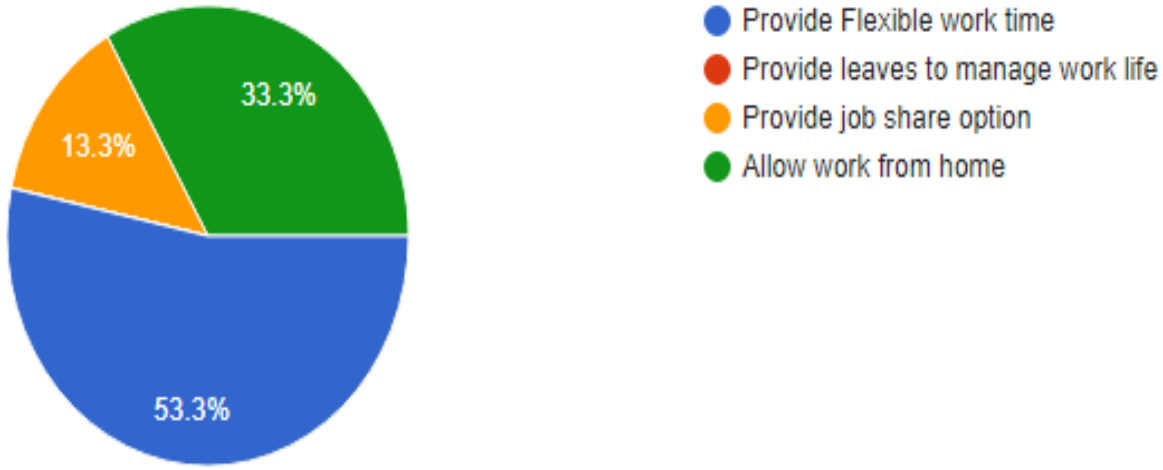

Figure 1.14 shows that 53.3% employees get flexible work hours,13.3% gets job share option and 33.3% gets work from home to manage work life of its employees

Q-15 Do you suffer related disease like hypertension, etc. or do you engage yourself in stress relieving programmes?

- Yes
- No

Table 15

	Frequency	Percentage
Yes	59	98.3
No	1	1.7

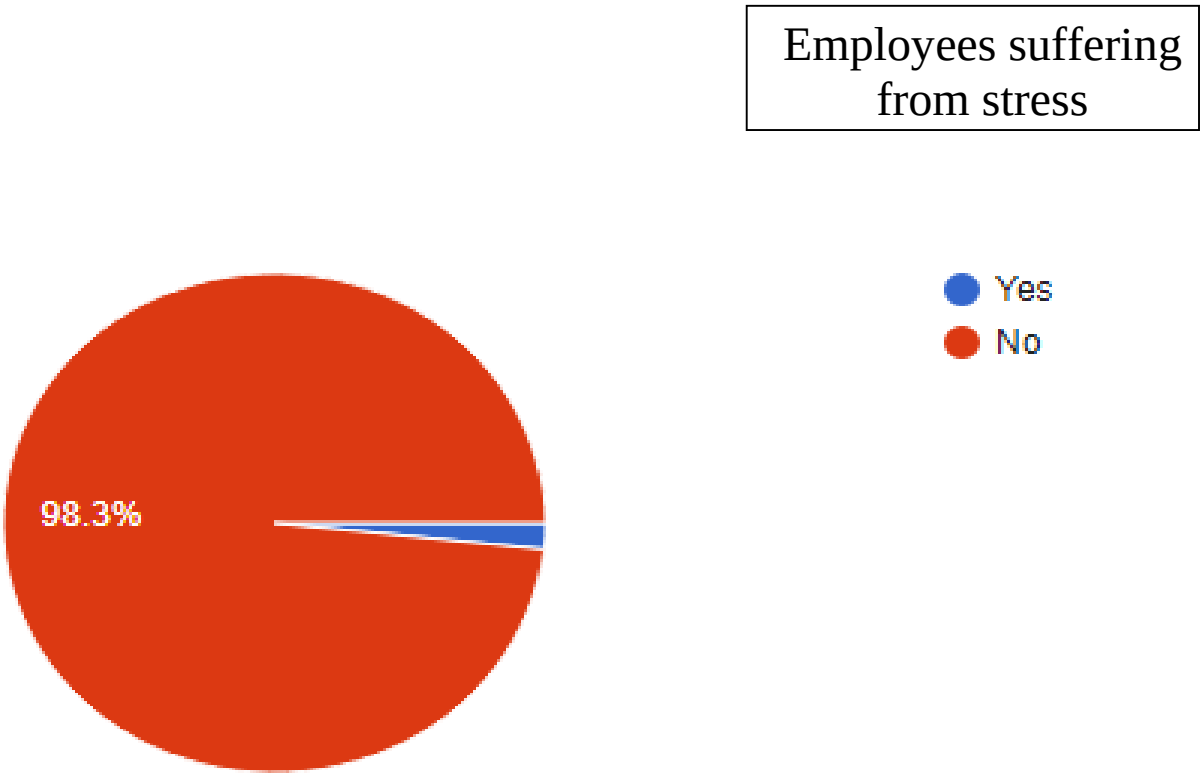

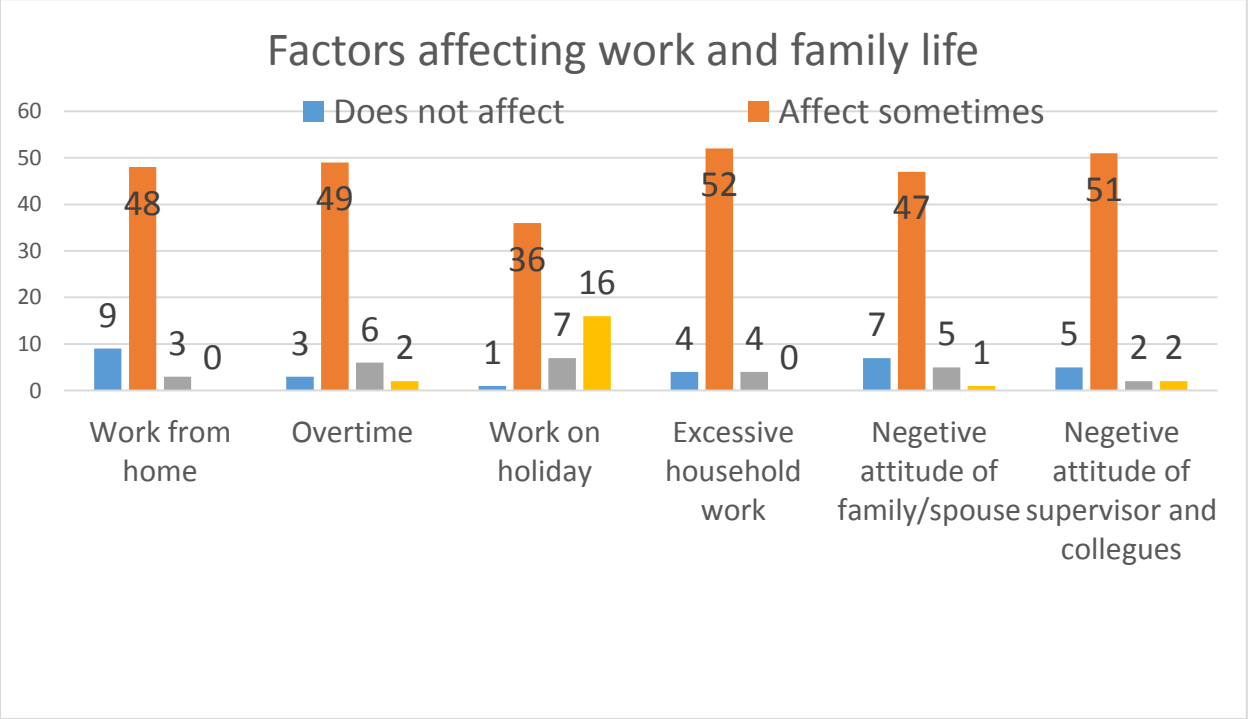

Figure 1.15 shows that 98.3% employees do not suffer from any hypertension or stress because of work but 1.7% suffer from hypertension and stress because of work.

Q-16 How do the following factor affect your work life and family commitment?

	Does not affect	Affect sometimes	Affect many times	Always affects
Work Home	9	48	3	0
Overtime	3	49	6	2
Work on holidays	1	36	7	16
Excessive household work	4	52	4	
Negative attitude of family/spouse	7	47	5	1
Negative attitude of supervisor/colleagues	5	51	2	2

***Only frequency allotted**

Q-17 Do you feel that you are able to balance your work and life?

- Yes
- No

Table 17

	Frequency	Percentage
Yes	19	31.7
No	41	68.3

Figure 1.17

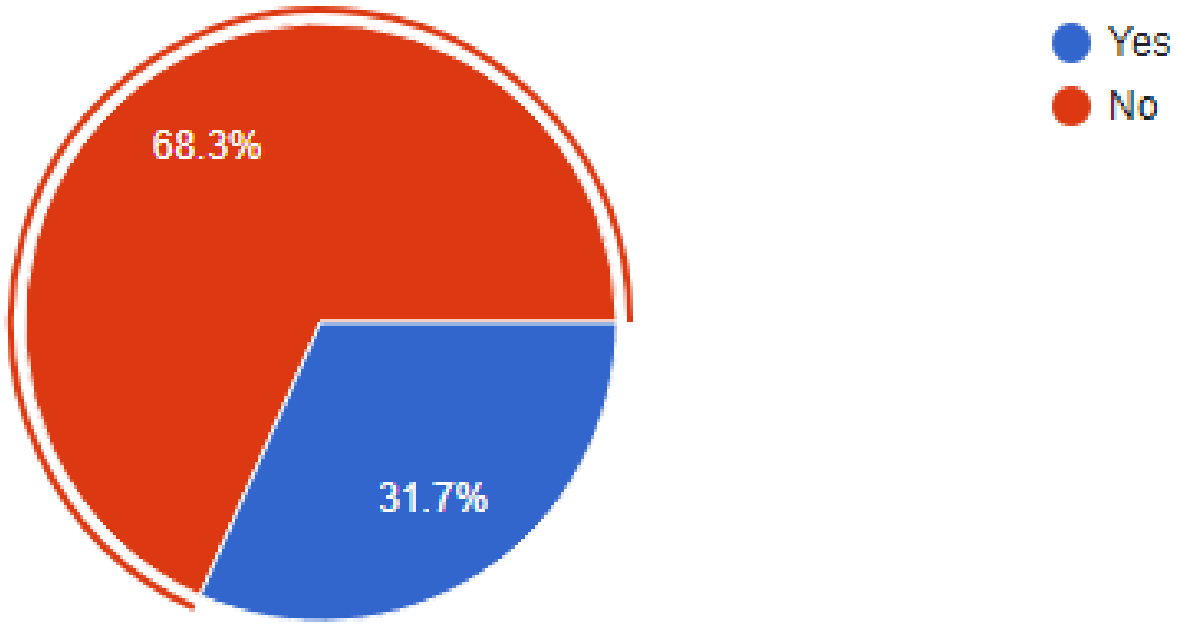

Figure 1.17 shows that 31.7% employees are able to balance work and personal life and 68.3 are not able to balance work and personal life

Chapter 7

Conclusion

Conclusions:

According to me work life balance plays important role in employee's performance. An employee can only work effectively and efficiency if he has a balance between work and personal life. Companies and organisation must take corrective measure to help employees in keeping balance between their work and personal life.

If an employee is not able to give time to family, they will feel bad and will have a negative behaviour towards employees which affects employee's performance which reduces productivity. Similarly employees need a good, healthy and positive work life so that they can even focus on their personal life.

Helping employees in balancing their work life will boost their morale and will reduce turnover.

Every human being needs a peace life. Stress, Hypertension, pressure regarding their work and family can disturb their peace.

Lastly I conclude that company can take action and initiatives regarding providing employees such environment where they can have a balance between work and personal**.**

Chapter 8

Suggestions

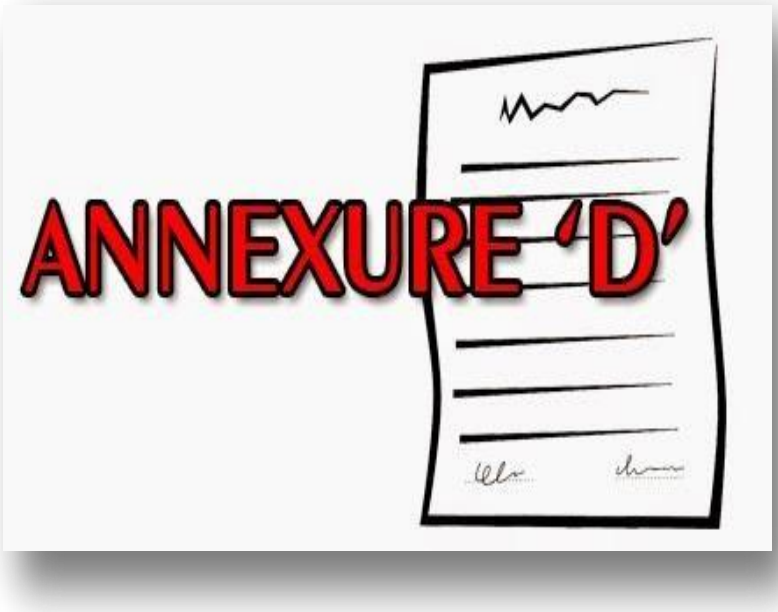

Suggestions:

- Several recommendations can be made based on survey results
- Firstly it is worthwhile to conduct an employee work life balance analysis periodically to measure the level of their work life balance.
- Organisation can take possible initiatives to help employees balancing work life
- Employees are to be motivated regarding their work at their bad times.
- The employees must give importance to time management techniques their by they can complete their work within specified period of time
- Many tasks can be delegated to subordinates without losing effectiveness so that reduce the overload of work.
- Counselling the employees when they face problems, because counselling is the discussion of a problem that usually has emotional content with an employee in order to help the employee cope better.
- Create Family friendly Environment
- Consider creative incentives
- Create a fun committee

Appendices
Questionnaire

Respected Respondent

I, Jeni Patel, studying third year of BBA at Vidhyadeep institute of Management. I am having Comprehensive Project on ―A study on Work life Balance of Employees. I would be highly obliged if you kindly fill up this questionnaire for said purpose. I assure you that your response would be kept highly confidential and used only said purpose.

Q.1 Gender:

- Female
- Male
- Transgender

Q.2 Age

- 21-25
- 26-30
- 31-35
- 36-40
- 41 and above

Q.3 Education

- SSC
- HSC
- Post Graduate
- Graduate
- Others

Q-4 Department

- HRD
- Marketing
- Production
- Finance
- Research and development
- Others

Q-5 Marital Status

- Married
- Unmarried

Q-6 Family Type

- Nuclear
- Joint
- Alone

Q-7 **Do you have children**

- Yes
- No

Q-8 How many hours you work in week?

- less than 48hours
- 48 hours
- more than 48hours

Q-9 Does you're working hours fits your personal life?

- Yes
- No
- Maybe

Q-10 How much time you spend on domestic activities?

- less than 2hours
- 2-4hours
- 4-6 hours

Q-11 **Do you work long hours or overtime or even holidays**?

- Frequently
- Sometimes
- Occasionally
- Rarely
- Never

Q-12 **How often do you think or worry about work (when you are really not at work?)**

- Frequently
- Sometimes
- Occasionally

Q-13 **Do you usually miss quality time with your Family and friends because of pressure of work?**

- Frequently
- Sometimes
- Occasionally
- Rarely
- Never

Q-14 Does your Organization take any initiative to manage work life of its employees?

- Provide Flexible work time
- Provide leaves to manage work life
- Provide job share option
- Allow work from home

Q-15 Do you suffer related disease like hypertension, etc. or do you engage yourself in stress relieving programmes?

- Yes
- No

Q-16 How do the following factor affect your work life and family commitment?

	Does not affect	Affect sometimes	Affect many times	Always affects
Work Home				
Overtime				
Work on holidays				
Excessive household work				
Negative attitude of family/spouse				
Negative attitude of supervisor/colleagues				

Q**-17 Do you feel that you are able to balance your work and life?**

- Yes
- No
